Silver Filigree Product Catalogue

Silver Filigree

Filigree is a handcrafted work that entails kneading, twining, and melding precious metals like of which the world has not seen before.

In Silver Filigree work, the articles have an intricate trellis-like network (referred to as 'jali' in the local parlance) made of twisted silver wire. The making of this silver wire is in itself a fascinating process. Pure silver ingots are put through a wire-drawing machine to produce very fine hair-like wires. Two of the thinnest wires are heated and wound around a 'charkha' and flattened again. These are then twisted together and crimped into zigzag patterns around the ribs of the design formed by thicker strips of silver, and expertly soldered. The motifs are usually leaves, flowers, creepers, animals and birds.

Each of these articles is carefully crafted to perfection. Each article is distinct and has its own story to tell. These articles exude a special charm which magically takes you to the enchanted world of Kings.

The thrill of transforming every day articles into something majestic is what keeps our Telangana silversmiths running.

We closely collaborate with these craftsmen to provide them all the necessary economic and social support to sustain and grow in their endeavours, as is our responsibility.

By the amazing craftsmanship of our silversmiths, articles like toys, decorative pieces, boxes, cases, plates, glasses, containers are transformed into royal pieces of art with Metal Purity: 925 parts per 1000. Dive through our collection:
